T-Gold + METS Supplement 展館特刊

29/7 - 2/8 / 2022

香港貿發局香港國際珠寶展
HKTDC Hong Kong International Jewellery Show

「T-GOLD + METS」展館
「T-GOLD + METS」Pavilion

香港會議展覽中心 展覽廳 3E
HALL 3E, Hong Kong Convention and Exhibition Centre

「T-Gold + METS」展館歷來有 80 多家參展商，但受新冠疫情影響，是次展覽展館規模雖小，仍邀得兩家香港國際知名的設備公司參展，即將為你介紹他們的最新產品。

「T-Gold + METS」展館匯聚專業的珠寶鐘表機械、設備、技術及用品，自 2016 年起更成為香港貿發局每年三月舉辦之「香港國際珠寶展」的重要組成部分。由意大利展覽集團 (Italian Exhibition Group) 主辦的「T-Gold」是世界上最重要的貴金屬技術展示平台，為全球金匠和珠寶製造行業提供頂級的意大利製造設備，進一步鞏固了意大利技術在國際舞台上的領先地位。「METS」則由香港珠寶玉石廠商會展覽服務有限公司主辦，展示亞洲現代珠寶鐘表業的先進設備和技術，薈萃亞洲創意。

明年展覽將於 2023 年 3 月 1 日 (星期三) 至 3 月 5 日 (星期日) 舉行。歡迎蒞臨「T-Gold + METS」展館，與世界各地及本地之展商交流行業知識及豐富行業新技術！

Used to house more than 80 exhibitors, 'T-Gold + METS' pavilion is deeply affected by the Covid-19; which makes exhibitors from overseas, like Italy, not able to attend the fair this time. Despite the smaller scale of the pavilion this year, two world-famous local equipment companies will be joining us. Here below is a glimpse for you of their latest products.

'T-Gold + METS' pavilion gathers professional machinery, equipment, technology and supplies of the jewellery and watches industry. Since 2016, the pavilion has been an integral part of the 'Hong Kong International Jewellery Show' held by HKTDC in March every year. 'T-Gold', organized by Italian Exhibition Group, is the most important platform showcasing the technology applied to precious metals. By providing top-of-the-line Italian-made equipment to global goldsmiths and jewellery manufacturing industries, it consolidates the leading position of the Italian technology internationally. Organised by HKJJA Exhibition Services Ltd., 'METS' is considered to be a convergence of the Asian innovation and creativity, relentlessly presents the advanced equipment and technology.

The next edition starts from 1-5 March 2023, from Wednesday to Sunday. We welcome you to meet us at 'T-Gold + METS' to exchange the latest knowledge and technology of the field!

珠寶配件老字號在創新中發展

Time-honoured finding brand develops through innovation

潤記號金飾珠寶配件有限公司 (YKA) 及潤基金業有限公司 (YKB) 分別成立於 1983 年及 1989 年，以優質、多樣化的產品和熱誠待客的服務態度在行業內取得品質和信譽的保證。近年來，疫情令行業整體疲弱，為配合市場趨勢瞬息萬變，公司在專營領域保持高質產出的同時，仍保持創新求變，擴展產品類別，以迎合市場需要。

YKA 主營珠寶首飾配件，提供不同貴金屬成色、尺寸和設計的選擇，並為客人提供獨特設計及訂製服務；YKB 主營貴金屬買賣、電鍍用品、焊接材料等。據公司董事長張君麗小姐透露，YKA 的配件產品在行內暢銷逾數十年，深受珠寶廠商的青睞，主要原因在於產品多年保持高質量保證。

公司除保證暢銷產品質素，還不斷推陳出新。例如最近推出的「空心管系列」，正是研發團隊和工匠們通力合作的成果，利用空心設計的耳針、手鐲、耳環和調節珠令首飾更輕盈，佩戴更舒適。

另一項創新是珠寶金飾的訂製服務，公司會根據客人所需而設計不同款式的首飾如頸鏈、手鐲或按客人要求設計製訂首飾半成品。張君麗小姐說：「因我司業務範圍全面、結合多年的經驗和專業知識，可提供多元化選擇。」

談及配件市場的前景，她表示：「配件市場的前景就等同於珠寶市場的前景，我對其仍有信心。行業要與時並進，設計一些響應市場所需的產品，迎合不同年齡層的消費群去創新產品設計。當然，市場推廣亦十分重要。」

跟以往客戶訂單量相比，目前市場訂單量偏少。因應此趨勢，公司不設最低訂單門檻以迎合客戶。張君麗小姐指，配件市場自 2020 年疫情以來銷售情況不甚理想，但公司在逆境中求變，在市場惡劣環境下，業績仍能夠保持穩定。她補充，疫情下公司專注於香港本地市場的產品推廣及繼續開拓海外市場。

Yuen Kee Ho Gold Jewelry Accessories Company Limited (YKA) and Yuen Kee Bullion Company Limited (YKB) established in 1983 and 1989 respectively, they have become a guarantee of quality and credibility in the industry with high-quality diverse product offerings and comprehensive service. In recent years, facing the overall gloomy jewellery industry under the COVID pandemic and the rapid changes in market trends, the companies have maintained high-quality output in their specialised areas while expanding product categories to better serve the market.

YKA is specialised in jewellery findings, it also provides finding customisation service for customers' unique designs. YKB is mainly engaged in bullion broking, plating appliances, solders and materials. According to Eva Cheung, the chairwoman of two companies, some of YKA's finding products have been selling well in the market for more than decades and are favoured by jewellery manufacturers, mainly because of their quality assurance and product stability for years.

While the companies continue to ensure the consistent quality of their best-selling products, they constantly innovate in different areas of business. The recently launched 'Hollow Tube Collection' from YKA is a great example. It is the outcome of the collaboration between its R&D team and craftsmen to make jewellery lighter and more comfortable to wear with hollow collections such as earring posts, bangles, rings and stoppers.

Another innovation is YKA's gold jewellery customisation service. The company offers different designs of jewellery such as necklaces & bracelets according to the needs of customers. They would make semi-finished jewellery if the customers have their own designs. "The reason why many of our innovations can be realised is because of our comprehensive business scope, years of experience and expertise, and can provide a variety of product choices for customer's selection." Eva Cheung said.

Speaking of the jewellery finding market's outlook, Eva Cheung said: "The outlook of the jewellery finding market is equivalent to the outlook of the jewellery market, and I still have confidence in them. The industry needs to keep pace with the times and to design products that respond to market needs, such as innovating product designs for different age groups of consumers. Marketing is undoubtedly another essential tool to have our strong presence in the market."

Compared with the customer large orders in the past, the current order volume is small now. In response to this trend, the companies do not set minimum order threshold to cater the customers. Eva Cheung pointed out that sales of the jewellery findings market have not been ideal since the epidemic in 2020, but the company's performance can be maintained thanks to their adjustments towards market changes and challenges. She added that under the COVID pandemic, their companies have not only put their focus on product marketing in local market, but also continue to develop overseas markets.

Sarine 與 NGTC 合作在中國推出評級報告 Sarine Partners With NGTC on Grading Reports In China

Sarine Technologies 與中國國家珠寶玉石質量監督檢驗中心 (NGTC) 將為中國內地市場推出聯名評級報告和服務。

據 Sarine 指，報告將為中國市場建立一個鑽石光彩度的行業新標準。NGTC 在 2019 年與 Sarine 達成協定共同為中國制定新的鑑定指導後，在過去兩年半的時間裡，一直使用 Sarine 的技術如「DiaMension® HD」和「Sarine Light™」對各種切工品質的鑽石進行廣泛的檢測。實驗室隨後還致力於改進內部的檢測方法，以及數據收集和分析，並與 Sarine 進行定期溝通。

以「Sarine Light™」設備為基礎新標準將鑽石評級範圍從標準的 4C 擴展到提供關於明亮度、閃耀度、火彩度和對稱度的信息。

Sarine Technologies 行政總裁 David Block 表示，Sarine 與 NGTC 之間的聯盟將為鑽石零售商和消費者創造一個全新的體驗，提高透明度並促進更強大的鑽石消費市場。

Sarine Technologies and China's National Gemstone Testing Center (NGTC) will introduce co-branded grading reports and services for the mainland China market.

According to Sarine, the reports will establish a new industry standard for light performance in China market. For the past two-and-a-half years, NGTC has been carrying out extensive tests on diamonds of various cut qualities using Sarine's technology including DiaMension® HD and Sarine Light™ following a 2019 agreement to co-develop new testing guidelines for China. The lab then worked on improving internal testing methods and data collection and analysis, alongside regular communication with Sarine.

The new standard based on Sarine Light™ device expands diamond classification beyond the standard 4Cs to offering information on brilliance, fire, sparkle and light symmetry.

The alliance between Sarine and NGTC will create a new experience for diamond retailers and consumers, heighten transparency and facilitate a more robust diamond consumer market, said David Block, CEO of Sarine Technologies.

METS 產品焦點 PRODUCTS SHOWCASE

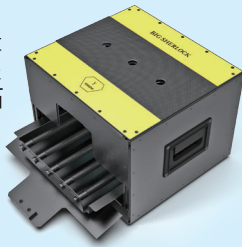

Big Sherlock

鑽石生產商協會 (DPA) 推出 Project Assure 計劃測試業內合成鑽石檢測儀，結果是 Yehuda 的「Sherlock Holmes」檢測合成鑽石的成功率為百分之百。這成績未有令供應商滿足，反而驅使他們更上一層樓。

一台大規模的「Sherlock Holmes」已於 JCK 展時面世，可以同時檢測 80-108 枚戒指，以及體積較大的首飾如手鏈和項鍊等。

The Diamond Producers Association (DPA) launched Project Assure to compare the quality of the industry's synthetic diamond detectors, and it turned out that Yehuda's "Sherlock Holmes" had a 100% detection accuracy in detecting synthetic diamonds. This achievement did not satisfy the suppliers but drove them to a higher level.

A larger-scale "Big Sherlock" has been launched at the JCK exhibition, which can detect 80-108 rings at the same time, as well as larger jewelry pieces such as bracelets and necklaces.

Dr. Watson

易於攜帶、在不同場合也能進行檢測的 Dr. Watson，雖然每次檢測只可容納 6 枚戒指或 50 克拉裸石，但方便攜帶於世界各地的展覽中使用。

Easy to carry, Dr. Watson can carry out tests in different occasions. Although only 6 rings or 50 carats loose stones can be tested each time, its portability allows you to take it to different exhibitions around the world.

尚有最熱賣的 Sherlock Holmes 4.0

Still, the best-selling Sherlock Holmes 4.0

與 Sherlock Holmes 3.0 的售價一樣，但檢測範圍及容量較大。

如有興趣免費以 Dr. Watson 或 Sherlock Holmes 4.0 作檢測，於展覽期間可攜貨到本公司攤位 3E-A36。

以 Big Sherlock 免費測試請致電 (852) 2334 4311 或電郵至 info@HongKongJewellery.com.hk 預約。

Same price as the Sherlock Holmes 3.0 but with a wider detection range and larger capacity.

If you are interested in testing with Dr. Watson or Sherlock Holmes 4.0 for free, you are welcome to bring the goods to the booth 3E-A36 during exhibition.

For Big Sherlock free testing, please call (852) 2334 4311 or email to info@HongKongJewellery.com.hk for appointment.

適合珠寶及寶石業的 AGIL 專業珠寶燈 Professional lighting from AGIL for the jewellery and gemstones industry

功能簡介

1. 鑽石及彩寶專業珠寶評級
2. 一鍵觸控開關
3. 可調 6500K、5000K 兩種色溫模式
4. 三段可調節光度
5. LED 光源，低碳、環保
6. 無頻閃、炫光
7. 低能耗設計，高效節能，使用壽命長
8. 鑽石和彩寶珠寶攝影

Description of Function

1. Professional jewellery grading for diamonds and coloured gemstone
2. One touch control switch
3. Multi-colour temperature modes: 6500K and 5000K
4. Three level adjustable luminosity
5. LED light source, low-carbon, environmental friendly
6. No flickering and glare-proofed
7. Low energy consumption design, energy efficient, long life
8. Diamond and coloured gemstone jewellery photography
